

Mixed Media Instructions

(Part No. MM1)

Thank you for purchasing this mixed media.

Mixed media is measured by volume, not by weight, and may vary slightly from lot to lot. During shipping, the fine media will settle into the voids between the larger particles and give the appearance of less than one cubic foot.

When the media is placed in the filter, it should be backflushed prior to use in the system. This will remove any dust generated during shipping and re-sort the settled materials.

AQUATIC ECO-SYSTEMS™

2395 Apopka Blvd. • Apopka, FL 32703 • Phone: 877-347-4788 • Fax: 407-886-6787
